

**IT IS 1939 IN THE FIGHT AGAINST CLIMATE CHANGE:**

**DO WE HAVE A CHURCHILL OR A CHAMBERLAIN IN OTTAWA?**

**We will cut emissions from oil sands!  
We will cut them from industry, cars and  
trucks! Together we will start now!**

**Don't worry! I'm working on a plan to  
gradually slow the increase in emissions.  
You'll see - all in good time!**

Dear

Your government's plan to merely reduce the intensity of industrial emissions means that Canada's total emissions will continue to grow.

This isn't the leadership we Canadians want in the fight against global warming – it's climate change appeasement! That's not good enough for my community or our planet's future.

I urge you to call on Prime Minister Harper and cabinet to bring the revised *Clean Air and Climate Change Act* back before the House for a vote. It is a good bill, and we need it to pass and become law so that we can get on with the fight against climate change.

I'm waiting to see what you do because **next election I'm voting for real action on climate change.**

Sincerely, \_\_\_\_\_

Dear Environment Minister Baird:

Your plan to merely slow the increase in our greenhouse gas emissions sounds like climate change appeasement to me. That's not good enough for my family, my neighbours, or our planet's future.

Please bring the improved *Clean Air and Climate Change Act* back before the House for a vote and accept the results. It is a good bill, it's widely supported, and we need it to pass into law so that we can get on with actually reducing emissions.

I am waiting to see what you do because **next election I'm voting for real action on climate change.**

Sincerely, \_\_\_\_\_

Dear Prime Minister:

We need a Prime Minister in Ottawa who is ready to lead the country in the fight against climate change. Your plan to merely slow the increase in our emissions makes you a climate change appeaser!

Please bring the improved *Clean Air and Climate Change Act* back before the House for a vote and accept the results. It is a good bill, and we need it to pass into law so we can start reducing emissions.

I am waiting to see how your government acts on this, Mr Harper, because **next election I'm voting for real action on climate change.**

Sincerely, \_\_\_\_\_
